

egoo innovate

Empowering Better Being

Implement your biomarkers for
high-quality at-home studies

- Recruit Patients Easier
- Cost Reductions on Logistics
- Data logging

The Technology Behind egoo innovate

During all phases Ego Innovate will supply the necessary consultancy and products for success. Pricing and solutions are customized to the need of our customers/innovators.

Egoo Open System

Egoo Open Instrument

Egoo Open Capsule

Egoo I Lab

Egoo Collect (Optional)

Egoo Connect App

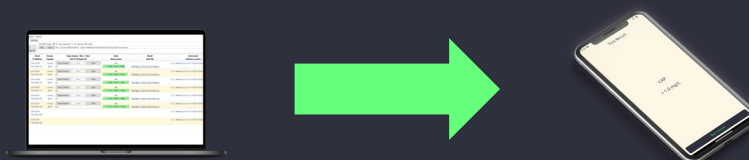

Phase 1: Implement Biomarker

Apply reagents to the **Egoo Open Capsule** and run the Assay Execution Protocol(AEP) on **ILab** to control your conditions and calibrate **Egoo Open System** during analysis. Optimize conditions for analysis perfection.

Phase 2: Small Scale Verification

Transfer the biomarker algorithm from **ILab** to **Egoo Connect App** and start small production of biomarker on **Egoo Open Capsule**. A small-scale clinical study is now ready for verification of biomarker and usability.

Phase 3: Scale Up Validation

Upon verification of phase 2, a scale up clinical research study is now ready to be launched and validated.
